Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 13, and 21-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Roth, US Patent 4,673,603. A rug that may be attachable to a step and a riser, said rug comprising in combination a bendable layer of material, said layer including first and second edges; one of a first hook fastener and a first loop fastener secured proximate one of said first and second edges (see element 50), one of a second hook fastener and a second loop fastener secured proximate another of said first and second edges; another of said first hook fastener and said first loop fastener adapted for attachment to the step; and another of said second hook fastener and said second loop fastener that may be adapted for attachment to the riser. The device can be used with a step and riser as claimed. The claimed method is inherent to the design.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 4-9, and 14-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roth in view of Althus et al., US Patent 4,829,627. Roth discloses the claimed invention except snap locks in conjunction with hook and loop fasteners, as claimed. Althus discloses the general concept of snap fasteners for the purpose of securing a mat. It would have been obvious at the time the invention was made for one skilled in the art to have utilized snap fasteners, similar to that taught by Althus, for the purpose of providing additional securing means to the device. The claimed method is inherent to the design.

5. Claims 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roth in view of Althus. Although the combination may not explicitly teach an adhesive layer as claimed, the examiner serves Official Notice that it is old and highly well known in the art to use adhesives for such purposes, as a means of securing components. It would have been obvious to have modified the device in

this way, for the purpose of providing means for securing parts of the device, as known in the art.
